Facilitating Mobile Device Deployments in the Business Sector

The deployment of mobile devices throughout the business sector is quickly expanding. 85% of organisations are currently in the research or pilot phase of a deployment—many of which are implementing mobile devices with the goal of improving communications, reducing costs or increasing revenues. Would it surprise you learn that 73% of organisations fail to plan how they’ll centrally charge and secure those devices, prohibiting their program’s ability to achieve intended results?

Statistics show that 10% of devices break or go missing each year of a deployment, which may be avoided if the devices are centrally secured and charged. This critical oversight can create painful hassles for employees and administrators alike. LocknCharge exists to help organisations rise above the rest and achieve deployment objectives by offering a solution to streamline device deployment and secure your investments.

Why is your organisation leveraging mobile devices?

- **Collect & Access Data**
  - Having the ability to quickly and accurately collect customer data drives many organisations to deploy devices. 41% of data breaches are caused by lost and stolen devices. Securing those devices can protect your business from thousands in crippling fines.

- **Decrease Costs**
  - Mobile devices help keep track of inventory and contain costs, but often overlooked is that organisations end up spending $1,800/employee each year on devices, adding back costs. A secure charging station lowers your per-employee cost by reducing the number of lost or stolen devices.

- **Convert More Sales**
  - Processing customer transactions more quickly leads to increased revenue, but it can’t be realised just by deploying mobile devices. Misplaced and uncharged devices lead to lost productivity and missed sales. Devices need to be centrally secured and fully charged so that they’re ready to use at all times.

- **Improve Communication**
  - Improving employee and customer communication is a goal of many deployments, but uncharged and missing devices can derail this goal. Centralised, secure charging sets your plan up for success by arming employees with a ready-to-use, fully-updated device.

- **Increase Efficiency**
  - Mobile devices seek to process business transactions more efficiently than paper processes, but devices need to be deployed from a central point to ensure employees always know where to find a fully-charged device—improving workflow and speeding up transaction times.

- **Increase Customer Satisfaction**
  - Mobile devices and on-demand charging can offer customers an improved experience and allow you to gain customer insights during their interaction with your business or brand.

lockncharge™
Enabling Your Mobile Device Workflow

**Centralised Charging**

**Putnam 8 or 16 Charging Station™**
- Charge, store and secure 8 or 16 iPad or tablet devices
- Quickly know the charging status of each device via the External LED charging display
- Short, organised cables allow you to reconnect devices quickly
- Small footprint and stackable design keep valuable desk or counter space free
- Pre-wired with lightning cables for easy setup
- Access all devices quickly with one, programmable combination lock

**Mobile Charging**

**CarryOn™ Charging Station**
- Charge, store and carry up to five iPad or tablet devices
- Easily move mobile devices between rooms, departments or buildings
- Quickly plug in devices with simple cabling and anchored cords
- Enable employees to collect data or process transactions on the go
- Small footprint keeps valuable desk space free
- Secure the station to a wall or desk with the provided mounting bracket and padlock

**On-Demand Charging**

**FUYL Tower™ Charging Locker**
- Features 15 individually-lockable compartments, each equipped with one power outlet and one 2.4 amp USB port
- View tower usage and manage access through web portal
- Securely charge devices without being tied to an individual outlet
- Patients can charge, store and secure personal mobile devices during high-stress times
- A seamless solution for check-in, check-out device programs or device loaner programs
