

iQ 20 or 30 Cart™

Sync, charge, store, secure and transport 20 or 30 iPad®, iPad Air™ or iPad mini™ devices.

iQ 20 Specs: 822mm (H) x 515mm (W) x 715mm (L) | 61 kg
iQ 30 Specs: 820mm (H) x 690mm (W) x 794mm (L) | 82.5 kg

LocknCharge makes life easier.

Top-Loading Cart Design. Access from multiple sides at once allows for quicker distribution of devices, plus no more bending down to remove devices from a bottom shelf. Removable panels in the bottom gives full access to power cords in one fell swoop. Your back and your sanity will thank you!

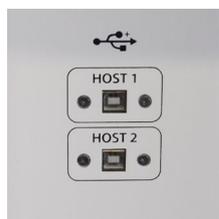

Pre-Wired and Organized.

iQ Carts comes pre-wired with 20 or 30 MFi-approved lightning cables, making setup a breeze. Cables stay organized and secure in the unique center channel, allowing you to plug in devices quickly after each use while making sure they don't sprout legs and wander off.

Small Baskets by LocknCharge.

These aren't your typical picnic baskets. Slotted device Baskets by LocknCharge make device deployments faster, safer and more efficient, putting valuable time back into your day.

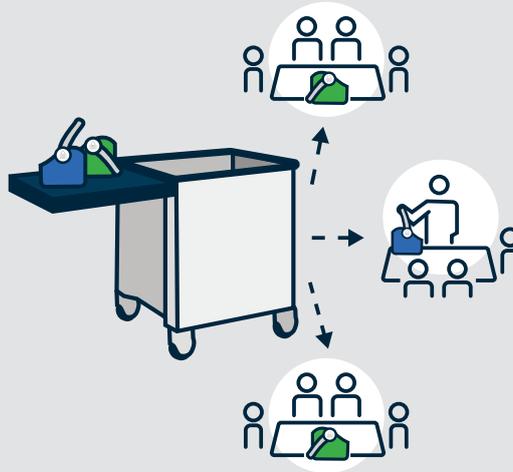

Efficiently Sync and Charge.

By connecting iTunes or Apple Configurator on your Mac to the two external USB host ports, the iQ 20 or 30 Cart can sync up 20 or 30 iPad devices simultaneously¹ while the Cart is locked. Your devices will always be charged up and up to date!

Smarter Workflow

Save Time, Save Money. Our goal is to save you valuable time, each and every day, thus putting money back towards your bottom line. Our Baskets enable hand-out and pack-up devices in less time, allowing you to forget about charging and focus on your goals.

Perfect for Shared Use. Not enough devices to go around? No problem. You can now easily share a small handful or a whole cartload of mobile devices between multiple areas without the fuss. When teamed up with our Baskets, our easy-to-maneuver Carts allow you to transport mobile devices quickly, safely and easily.

Additional Key Benefits

Compatible and Efficient. The iQ 20 or 30 Cart fits most iPad devices with or without cases. With 2.1 amp power at each port, this Cart is capable of charging up to 20 or 30 iPad, iPad Air or iPad mini devices at the same time.

Designed to Go Where Others Can't. Stairs, rough terrain or want to split your set of iPad devices? To make your life easier, the iQ 20 Cart comes with four, 5-slot Baskets by LocknCharge, and the iQ 30 Cart comes with six, 5-slot Baskets by LocknCharge.

Syncing Devices. LocknCharge's pre-installed iQ 16 Sync Charge Boxes automatically stage the availability of power to each port. This function prevents the potential of overloading the circuit, protecting your devices. The Sync Charge Boxes can be removed from the Cart to sync and charge devices almost anywhere.

Tough as Nails. iQ Carts are made with high-quality steel and are backed by a lifetime warranty².

Secure. Protect your device investment without worry. Lock away devices in the storage area with a padlock. An optional anchor kit locks the whole Cart to the floor.

Future-Proof. Think inside the box, and you won't be stuck with a bunch of outdated Carts. Removable racks and Baskets allow this Cart to adapt to future needs as devices change or new technology is added.

No Keys to Worry About. iQ Carts come with a high-quality, combination padlock.
