

EVO 40 Cart™

Charge, store, secure and transport up to 40 iPad®, iPad Air™ or iPad mini™ devices.

Specs: 34.07" (L) x 28.38" (W) x 35.69" (H) | 201 lbs

LocknCharge makes life easier.

Small Baskets by LocknCharge.

These ain't your grandma's Longabergers. The EVO 40 comes with eight slotted device Baskets to make deployment faster, safer and more efficient. Teachers can get back up to two weeks of teachin', giving students more time for learnin'.

Designed for Extreme Portability.

Equipped with smooth riding wheels, the Cart makes it easy to share devices among multiple classrooms. LocknCharge Baskets let you safely distribute devices up stairs, down halls, through doorways, over obstacles, and... you get the idea.

Highly Secure. Welded steel and a two-point locking system keep your valuable devices safe at all times. Plus, the optional anchor kit allows you to lock down your entire Cart, so it always stays right where you leave it.

Everything and the Kitchen Sync. The Sync & Charge model combines all the convenience of an EVO 40 Cart with three intelligent iQ 16 Sync Charge Boxes and MFi approved cables—allowing you to safely sync up to 40 iPad devices simultaneously² using iTunes or Apple Configurator.

Flexibility without the Bending.

Saving Time and Backaches. Baskets by LocknCharge are stored on both sides of the Cart to create a more efficient workflow. Not only is it better ergonomically, it also creates better and broader access to your iPad devices, so that teaching and learning can proceed much faster.

It's a Real Picnic. With the ability to remove the iQ 16 Sync Charge Boxes (Sync & Charge model only) along with the device Baskets from the EVO 40, syncing and charging can occur almost anywhere, independently of the Cart. So, pack a blanket, grab a Basket and go enjoy some high-tech freedom.

Additional Key Benefits

Pow Pow Powerful. Efficient Charging makes for a more productive iPad. With 2.1 amp power at each port, the EVO 40 Cart is capable of charging up to 40 iPad devices simultaneously.

Lightning™ Fast Setup. Setting up an EVO 40 Cart is as easy as one-two-three. 1.) Install your lightning cables (included with Sync & Charge model), conveniently housed at the top of the Cart. 2.) Plug the Cart into a power outlet. 3.) Start charging!

Security On the Move. Roll the EVO 40 and your devices anywhere you need them. You can rest assured knowing iPads not in use are inside the tilting storage compartments, each with a secure, 2-point locking system. At the end of the day, the heavy duty anchor kit (sold separately) offers additional peace of mind.

Intelligent Power Management. ECO Safe Charge™ can handle the power requirements of almost any device by staging the availability of power to each bank of devices – preventing a potential overload of the circuit and protecting your iPads.

Quick Access Storage. Beneath its lockable lid on the top of the EVO 40 Cart is a storage compartment large enough to hold a Mac, extra cables and other accessories. This is also where the power packs are stored to make cable setup and access really fast; like a-herd-of-hungry-students-after-the-lunch-bell fast.

Tough as Nails. LocknCharge products are built to last. That's why EVO 40 Carts are backed by a lifetime warranty³ worth writing home about.
