

iC 30 Cart™

Designed to charge up to 30 MacBook®, iPad®, iPad Pro™ or other devices.

36.6" (H) x 29" (W) x 26.4" (L) | 158 lbs

LocknCharge makes life easier.

Top Loading Cart Design. Access from multiple sides at once allows for quicker distribution of devices, plus no more bending down to remove devices from a bottom shelf. Cabinet style carts can take 2-3 times longer to wire, and the removable panel in the bottom gives full access to power cords in one fell swoop. Your back and your sanity will thank you!

Organized Cables and Hidden Bricks. Minimize classroom chaos by organizing those gosh darn cables once and for all. Cables stay secure in the unique side channel, allowing you to plug in devices quickly after each use. Power bricks are stored in the bottom of the Cart, making sure they don't sprout legs and wander off.

Baskets by LocknCharge. These ain't your grandma's Longaberger baskets. Slotted device Baskets by LocknCharge make device deployments faster, safer and more efficient. Teachers can get back up to two weeks of teachin', giving students more time for learnin'.

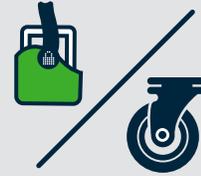

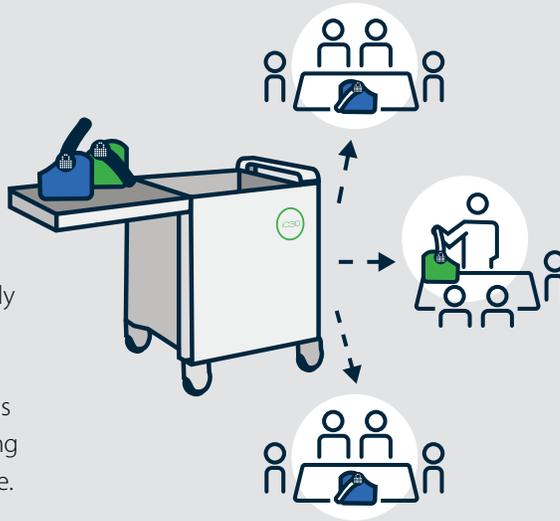

External Charging Status Display. Everyone knows teachers are super heroes, but as it turns out, most don't have x-ray vision. With our iC 30 Cart, it's super easy to know the charging status of your devices through the external ECO Safe Charge™ display.

Smarter Workflow

Less Wasted Time. More Teaching.

Our Baskets enable teachers AND students to hand out and pack up devices quickly and easily. This not only saves valuable time, but it also allows teachers to focus on teaching while empowering students to take the reins on classroom management by handing out devices without teacher assistance.

Perfect for Shared Use. Not enough devices to go around? No problemo. Schools can now easily share a small handful or a whole dang cartload of mobile devices between classrooms without the fuss. When teamed up with our baskets, our lightweight, easy-to-manuever Carts allow you to transport mobile devices quickly, safely and easily.

Additional Key Benefits

Efficient Charging.¹ The iC 30 Cart is capable of charging up to 30 devices simultaneously.

Top Sliding Lid Doubles as Work Surface. With a single handle design, the secure lid can be used as a work surface in space-strapped classrooms.

Safe Power Management. Never blow a fuse again. ECO Safe Charge™ handles power requirements of almost any device by staging the availability of power. Plus, it ensures that devices are not overcharged, increasing their longevity.

Tough as Nails. iC 30 Carts are made with high-quality, welded steel and are backed by a lifetime warranty.

Secure. Protect your device investment without worry. Lock away devices in the storage area with a padlock. An optional anchor kit locks the whole Cart to the floor.

Future-Proof. Think inside the box, and you won't be stuck with a bunch of outdated Carts. Removable racks and baskets allow this Cart to adapt to future needs as devices change or new technology (including STEM/STEAM) is added.

Style Meets Functionality. For better workflow, the iC 30 Cart features a sliding top lid so that devices can be accessed faster, easier and by more users at once.

Lock Included. Our iC 30 Cart comes with a high-quality, combination padlock.
