

Are you using your iJ36 cart to charge and store MacBook devices?

The ECO Safe Charge™ prevents the occurrence of a power surge when charging MacBook devices simultaneously. Use the recommended setting below to charge your MacBook devices safely and efficiently.

Press MODE button to switch mode

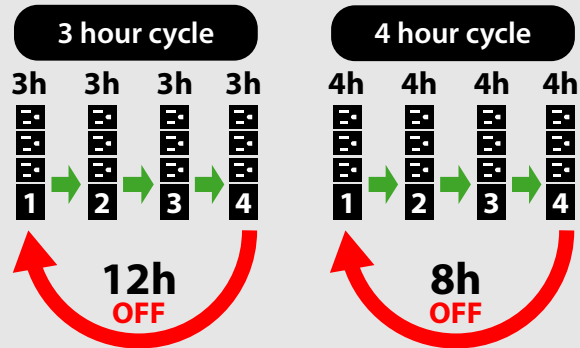

Minimum 3 hour cycle

To prevent a general electrical overload, the Timer Cycle mode individually powers each group of outlets at a time for the duration selected, then automatically turns the power off before applying power to the next group of outlets.

When all groups of outlets have been cycled through, power will remain OFF for all group of outlets for the rest of the 24 hour period fro.

Refer to *ECO Safe Charge™ User Instructions* for operation guide.
