

A LOOK AT HOW Student Device Downtime Impacts Learning

Results from a November 2022 Survey of US Educators.

In November of 2022, LocknCharge conducted a survey to educators from across the United States. The survey results of 171 responses gave us insight into device usage in the classroom and the disruptions to learning caused by device downtime.

DEVICE USE IN CLASS

59%

of teachers require the use of a device during class 3-5 times per week on average.

DEVICE USE AT HOME

55%

of teachers require the use of a device at home at least once per week on average.

DEVICE REPLACEMENT

57%

of teachers are assisting students with replacement or loaner devices at least one time per week on average.

Teacher-reported consequences if a student is without a working mobile device in class:

63%

of teachers cite lost learning time

45%

of teachers cite lost teaching time

33%

of teachers cite a negative impact on students' grades

28%

of teachers cite classmate disruption

Addressing the issue of device downtime for students is no longer optional. Smart Lockers by LocknCharge are proven to put a working device back into the hands of students faster, keeping them on track in class. Visit our website to learn more.
